

Paver Lighting System

PL250 Series

Architectural Accent Lighting For Hardscapes

Universal Size... Fits All Standard 2³/₈" (60 mm) And 2³/₄" (70 mm) Thick Concrete Pavers.

Durable Polycarbonate Construction... Withstands Vehicular And Pedestrian Traffic.

Economical Light Source... Uses A Low Voltage, 4-Watt, Long-Lasting Incandescent Lamp Module.

Maintenance-Free... Lamp Modules Are Totally Sealed, Weed And Corrosion Proof.

No Re-Lamping Necessary... Unique Cam-Lock™ Allows Quick Replacement Of Lamp Module.

Exclusive Power Tap™ Connector... Make Quick Circuit Connections To Power Supply Cable.

Inspiring Design And Cost-Efficient Operation... Developed With The Advanced Professional In Mind.

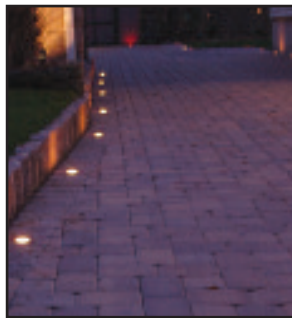

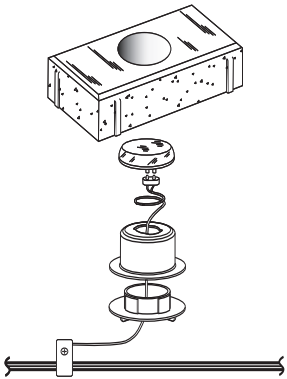

The Evening Star Paver Lighting System not only illuminates but also enhances the enjoyment, safety and appeal of outdoor living spaces for your customers. Here's how: While patio furniture, topiary, a barbecue grill and garden statuary all combine to create a sanctuary for outdoor living, **Evening Star Paver Lighting** extends daytime lifestyles into twilight time and beyond.

A mere 2 1/2 inches in diameter, the small footprint and understated, round design embody both function and flair. Instead of taking the place of a paver like other brands, **Evening Star Paver Lighting** installs directly into the paver flush with the surface — adding stylish, low voltage, accent and security lighting to patios, pool decks, entranceways, walkways, steps and driveways.

Satellite System Allows Optimum Design Flexibility

Using a diamond-tipped core drill, a hole is made through the paver to receive the Lamp Support Assembly and Lamp Module. The completed fixture quickly connects to standard 12/2 circuit cable with a unique, reusable Power Tap Connector™. *Two independent circuits can be operated from optional 10/3 cable.*

Lamp Modules—available in five designer and five architectural colors—are easily interchangeable or replaced by means of an exclusive Cam-Lock™ feature. No re-lamping is necessary.

Durable, long-lasting Lamp Modules are made from a UV stable polycarbonate. Since they are completely sealed, they are unaffected by water, snow plowing, corrosive de-icing salts, ocean environments and weeds will not grow under the lens.

US and Foreign Patents Pending. Made in USA.

Available From:

Evening Star™ PL250 Series Paver Light	
<p><i>Note: Each Lamp Support Assembly includes a base, tap connector and wire harness. Components are packaged together in a sealed poly bag for convenience. Order Lamp Modules separately.</i></p>	
Part No.	Description
PL60LSA	Lamp Support Assembly For 2 3/8" (60 mm) pavers.
PL70LSA	Lamp Support Assembly For 2 3/4" (70 mm) pavers.
PL250FR	Frost Lamp Module
PL250BL	Blush Lamp Module
PL250BW	Brandywine Lamp Module
PL250FI	Firefly Lamp Module
PL250SE	Sesame Lamp Module
PL250AS	Ash Lamp Module
PL250DR	Driftwood Lamp Module
PL250SG	Seaglass Lamp Module
PL250RO	Rouge Lamp Module
PL250PA	Pacific Lamp Module
PLCC50	50' Circuit Cable (12/2)
PLCC100	100' Circuit Cable (12/2)
PLCC500	500' Circuit Cable (12/2)
PLDCC500	500' Circuit Cable (10/3)
<p><i>Corrosion-proof plug and socket connection allows for quick lamp replacement.</i></p>	
<p><i>Exclusive Power Tap Connector™ permits quick, easy circuit connections without cutting the power supply cable.</i></p>	
Parts & Accessories	
PLWH	Wire Harness (24" long 18/2) Connects Lamp Modules to circuit cable.
PLTC	Power Tap Connector™ Connects the Wire Harness to standard 12/2 or optional 10/3 circuit cable. Reusable.
PLWN	Silicone-Filled Wire Nuts Used to connect additional lengths of 10 or 12 gauge circuit cable. Rated for direct burial.
PLACC	4 Oz. Tube Of Anti-Oxidant Compound Used to provide additional corrosive protection on electrical connections in adversely wet or salty locations.
PLACT	Adjustable Coring Template For starting and positioning holes in pavers when using a hand drill. Works well with the Field Installation Kit.
PLFIK	Field Installation Kit For coring a concrete paver using a hand drill with a 1/2" chuck. Kit contains a water swivel, 2 1/2" diameter, diamond-tipped core bit and instructions.
PLRT	Removal Tool For removing or replacing Lamp Modules after initial installation.
PLACB	Compressed Air (Aerosol Can) & Brush For removing sand and debris lodged in the area between the Lamp Module and the paver. Used when removing or replacing a module.
PLWSC	Wire Spool Caddy Holds one 500' spool. Folds easily for storage.
PLCCR	Circuit Cable Reel Easily manages cable as needed on the job.
Also Avail.	Transformers With Automatic Timers 44, 88, 100, 200 and 300 watts.
